

frogs for the future

50% of the world's
amphibians, including
all of New Zealand's
four native frog species
are endangered.

(National Frog Survey)

LET'S PROTECT OUR NATIVE FROGS

What can we do to help protect our frogs for the future?

- After study, put frogs and spawn back where you found them
- Get involved in the National Frog Survey. Go to www.nzfrog.co.nz
- Start planning what you can do for the Year of the Frog in 2008
