Milk's better in glass

PETITION TO SAVE GLASS MILK BOTTLES

Dear Graeme Hart,

We are concerned that you have decided to axe the popular South Island glass milk bottle, without any consultation with your customers, distributors, staff or the Government.

We, the undersigned, urge you to reverse this decision for the following reasons:

- Milk tastes better in glass !
- The humble glass bottle is environmentally responsible and makes many trips before being remade into a brand new bottle.
- Many people rely on the home delivery system - if you kill the milk bottle it will be threaten the viability of this service.
- Ratepayers do not want to pay more for the extra recycling and disposal costs of cartons and plastic bottles.
- Countries which pride themselves on their clean, green image are shifting to extended producer responsibility so why are you putting your profit ahead of what's best for the community and the environment?
